Manta

Manta

Giancarlo Piretti, 2025

Concepita per arredare gli spazi con leggerezza, Manta si distingue per il suo riflettore in alluminio sagomato e modellato, che assume la forma di cerchio perfetto, disponibile nei formati da 500 e 800 mm. La particolare curvatura del materiale assicura solidità e resistenza e favorisce un'efficace dissipazione termica, garantendo un'elevata efficienza complessiva. La lampada, a soffitto o a sospensione, fornisce un'illuminazione diretta grazie a un'ottica semisferica che ottimizza il comfort visivo, ideale sia per aree di lavoro che per ambienti spaziosi. Una luce indiretta, diffusa e uniforme viene generata da un diffusore prismato posizionato posteriormente, creando un'atmosfera avvolgente e armoniosa. Manta permette per la versione a soffitto di regolare l'orientamento delle ali anche successivamente al montaggio, offrendo un elevato grado di adattabilità. È possibile installare Manta singolarmente, in coppia o in gruppo, con lo scopo di realizzare composizioni equilibrate e dinamiche, perfette per valorizzare ogni tipo di contesto.

Designed to furnish spaces with lightness, Manta is distinguished by its shaped and moulded aluminium reflector, which takes the form of a perfect circle, available in 500 and 800 mm sizes. The special curvature of the material ensures solidity and strength and promotes effective heat dissipation, guaranteeing high overall efficiency. The luminaire, ceiling mounted or suspended, provides direct lighting thanks to a hemispherical optic that optimises visual comfort, ideal for both work areas and spacious rooms. Indirect, diffuse and uniform light is generated by a prismatic diffuser positioned at the rear, creating an enveloping and harmonious atmosphere. For the ceiling version, Manta allows the orientation of the wings to be adjusted even after installation, offering a high degree of adaptability. It is possible to install Manta individually, in pairs or in groups, in order to create balanced and dynamic compositions, perfect for enhancing any type of context.

Manta wurde entwickelt, um Räume mit Leichtigkeit auszustatten, und zeichnet sich durch seinen geformten und gegossenen Aluminiumreflektor aus, der die Form eines perfekten Kreises hat und in den Größen 500 und 800 mm erhältlich ist. Die besondere Krümmung des Materials sorgt für Solidität und Festigkeit und fördert eine wirksame Wärmeableitung, was eine hohe Gesamteffizienz garantiert. Die an der Decke montierte oder abgehängte Leuchte bietet dank einer halbkugelförmigen Optik, die den Sehkomfort optimiert, eine direkte Beleuchtung, die sowohl für Arbeitsbereiche als auch für große Räume ideal ist. Indirektes, diffuses und gleichmäßiges Licht wird durch einen prismatischen Diffusor auf der Rückseite erzeugt, der eine umhüllende und harmonische Atmosphäre schafft. Bei der Deckenversion von Manta kann die Ausrichtung der Flügel auch nach der Installation noch verändert werden, was ein hohes Maß an Anpassungsfähigkeit bietet. Es ist möglich, Manta einzeln, paarweise oder in Gruppen zu installieren, um ausgewogene und dynamische Kompositionen zu schaffen, die jede Art von Kontext aufwerten.

Conçue pour meubler les espaces avec légèreté, Manta se distingue par son réflecteur en aluminium façonné et moulé, qui prend la forme d'un cercle parfait, disponible dans les dimensions 500 et 800 mm. La courbure spéciale du matériau assure solidité et résistance et favorise une dissipation efficace de la chaleur, garantissant un rendement global élevé. Le luminaire, monté au plafond ou suspendu, fournit un éclairage direct grâce à une optique hémisphérique qui optimise le confort visuel, idéal aussi bien pour les zones de travail que pour les pièces spacieuses. La lumière indirecte, diffuse et uniforme est générée par un diffuseur prismatique placé à l'arrière, créant une atmosphère enveloppante et harmonieuse. Pour la version plafond, Manta permet de régler l'orientation des ailes même après l'installation, offrant ainsi un haut degré d'adaptabilité. Il est possible d'installer Manta individuellement, par paires ou par groupes, afin de créer des compositions équilibrées et dynamiques, parfaites pour mettre en valeur n'importe quel type de contexte.

Diseñada para amueblar espacios con ligereza, Manta se distingue por su reflector de aluminio moldeado, que adopta la forma de un círculo perfecto, disponible en tamaños de 500 y 800 mm. La curvatura especial del material asegura solidez y resistencia y favorece una disipación eficaz del calor, garantizando una elevada eficacia global. La luminaria, de techo o suspendida, proporciona una iluminación directa gracias a una óptica semiesférica que optimiza el confort visual, ideal tanto para zonas de trabajo como para espacios amplios. La luz indirecta, difusa y uniforme, es generada por un difusor prismático situado en la parte trasera, creando una atmósfera envolvente y armoniosa. En la versión de techo, Manta permite ajustar la orientación de las aletas incluso después de la instalación, ofreciendo un alto grado de adaptabilidad. Es posible instalar Manta individualmente, en parejas o en grupos, para crear composiciones equilibradas y dinámicas, perfectas para realzar cualquier tipo de contexto.
